

Mission, Vision, and Purpose

Colville High School's comprehensive Culminating Project is a graduation requirement, and it will be completed in the senior year via CWP and English.

The Culminating Project...

- Teaches reinforcement and demonstration of: research skills, higher level thinking, speaking skills, writing skills, organizational skills, responsibility, time management, and portfolio development.
- Provides a means other than testing to measure accomplishment.
- Involves the community.
- Improves and combines many aspects of the curriculum.
- Adds meaning to the last year of high school.
- Allows students to shine.

This project will build on concepts learned in other classes. The Culminating Project compiles into one sequence a final project that encompasses the skills students who graduate from high school should already have. The project will then require students to demonstrate these skills at a competent level.

The State Board of Education has linked graduation requirements to student learning goals. We believe our Culminating Project addresses all of these:

Goal 1: Read with comprehension, write with skill, and communicate effectively and responsibly in a variety of ways and settings.

Goal 3: Think analytically, logically, creatively, and integrate experience and knowledge to form reasoned judgments and solve problems.

Goal 4: Understand the importance of work and how performance, effort, and decisions directly affect future career and educational opportunities.
