This is an important message from the Colville School District

We just received information from the Northeast Tri-County Health District confirming that the individual who was tested for COVID-19 tested **negative**. This person took immediate precautions and minimized contact with others during the investigation. While we are relieved for this individual, we will remain vigilant in our attempts to slow the spread of COVID-19.

The Northeast Tri County Health District reports that within Ferry, Pend Oreille, and Stevens Counties, there have been no confirmed cases and no individuals remain under investigation.

We want to again say thank you for your patience as we worked through this issue. We took the necessary precautionary measures to ensure that students, staff and our community remained as safe and healthy as possible
