

# Windows Updates

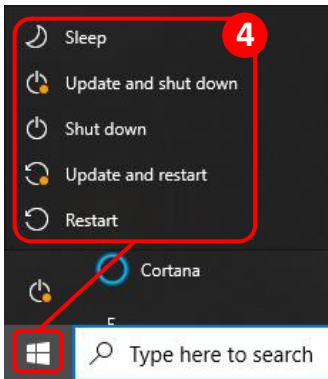

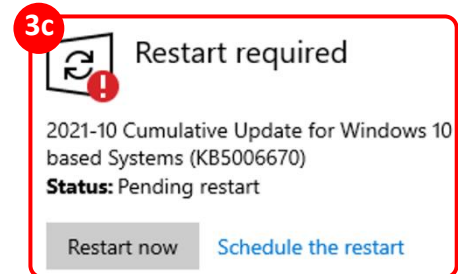

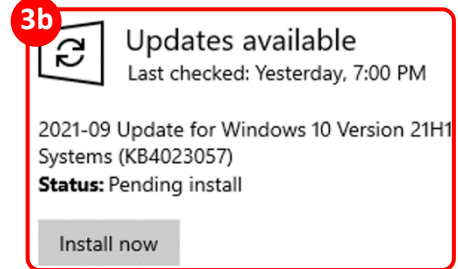

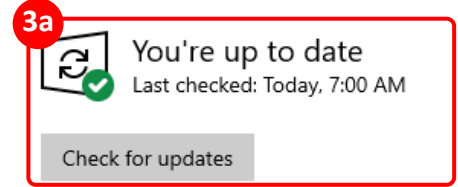

(1) Navigate to the Windows menu and then to Settings.

(2) From Settings navigate to the Update and Security section.

(3) From **Updates and Security**, you will see 1 of 3 options:

(3a) You're up to date; from this menu, you can verify the device is updated by clicking on **Check for updates**.

(3b) Updates available; from this menu; you can force the updates to be installed by clicking on **Install now**.

(3c) Restart Required; from this menu you can trigger a restart by clicking Restart now.

(4) If a restart is required, you will see the option in the power menu as an option.

When required, a restart is **highly** recommended.
